

## Content of Save Data to an HTML File.vbs ( Site 1 )

' Description: Sample HTML function that saves the data found in a SPAN named DataArea to a text file named test.htm.

```
Sub RunScript
  Set objFSO = CreateObject("Scripting.FileSystemObject")
  objFSO.CreateTextFile("test.htm")
  Set objFile = objFSO.OpenTextFile("test.htm", 2)
  objFile.WriteLine DataArea.InnerHTML
  objFile.Close
End Sub
```
