

Content of Search for a Record in a Recordset.vbs (Site 1)

' Description: Searches an ADO database with a DSN of "Inventory" looking for a specific computer record.

```
Const adOpenStatic = 3  
Const adLockOptimistic = 3  
Const adUseClient = 3
```

```
Set objConnection = CreateObject("ADODB.Connection")  
Set objRecordset = CreateObject("ADODB.Recordset")
```

```
objConnection.Open "DSN=Inventory;"  
objRecordset.CursorLocation = adUseClient  
objRecordset.Open "SELECT * FROM Hardware" , objConnection, _  
adOpenStatic, adLockOptimistic  
strSearchCriteria = "ComputerName = 'WebServer'"  
objRecordset.Find strSearchCriteria
```

```
If objRecordset.EOF Then  
    Wscript.Echo "Record cannot be found."  
Else  
    Wscript.Echo "Record found."  
End If
```

```
objRecordset.Close  
objConnection.Close
```
