

Content of Send Email from a Script.vbs (Site 1)

' Description: Demonstration script that uses CDO to send email from a computer where the SMTP Service has been installed.

```
Set objEmail = CreateObject("CDO.Message")
```

```
objEmail.From = "monitor1@fabrikam.com"
```

```
objEmail.To = "admin1@fabrikam.com"
```

```
objEmail.Subject = "Atl-dc-01 down"
```

```
objEmail.Textbody = "Atl-dc-01 is no longer accessible over the network."
```

```
objEmail.Send
```
