

Content of Start AutoStart Services that have Stopped.vbs (Site 1)

' Description: Restarts any auto-start services that have been stopped.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")

Set colListOfServices = objWMIService.ExecQuery _
    ("Select * from Win32_Service Where State = 'Stopped' and StartMode = " _
    & "Auto")

For Each objService in colListOfServices
    objService.StartService()
Next
```
