

Content of Start the DNS Server Service.vbs (Site 1)

' Description: Starts the DNS server service on a computer.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:" _
    & "(impersonationLevel=impersonate)!\\" & strComputer & _
    "\root\MicrosoftDNS")

Set collItems = objWMIService.ExecQuery("Select * From MicrosoftDNS_Server")

For Each objItem in collItems
    objItem.StartService()
Next
```
