

## Content of Tell Which Account a Service is Running Under.vbs ( Site 1 )

```
strComputer = "."
Set objWMIService = GetObject _
("winmgmts:\\" & strComputer & "\root\cimv2")
Set colServices = objWMIService.ExecQuery _
("Select * From Win32_Service")
For Each objService in colServices
    Wscript.Echo objService.Name, objService.StartName
Next
```
