

Content of Terminate a Process.vbs (Site 1)

' Description: Terminates any running instances of Notepad.exe.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")

Set colProcessList = objWMIService.ExecQuery _
    ("Select * from Win32_Process Where Name = 'Notepad.exe'")

For Each objProcess in colProcessList
    objProcess.Terminate()
Next
```
