

Content of Use Windows PowerShell to Automate Microsoft Excel.ps1 (Site 1)

```
$a = New-Object -comobject Excel.Application
```

```
$a.Visible = $True
```

```
$b = $a.Workbooks.Add()
```

```
$c = $b.Worksheets.Item(1)
```

```
$c.Cells.Item(1,1) = "A value in cell A1."
```

```
$b.SaveAs("C:\Scripts\Test.xls")
```

```
$a.Quit()
```
